Belfast, Northern Ireland | huzaifawha@gmail.com | +44 7900 362383 | linkedin.com/in/huzaifa-amir-rasheed | github.com/RCS504 | rcs504.github.io/Portfolio

EDUCATION

Queen's University Belfast

Bachelor of Science in Computer Science with Professional Experience. Year 1 result: 2:1 (67.5%). Queen's Excellence Award, awarded for achieving above 60%. Expected 2029

Relevant Coursework: Object-Oriented Programming, Data Driven Systems, Introduction to Cyber Security, Procedural Programming, Computer Architecture

Queen's University Belfast International Study Centre

Foundation Degree, Science and Engineering.

International British School Kuwait

High School Diploma, Computer Science.

Belfast, Northern Ireland

Belfast, Northern Ireland

2024 - 2025

Kuwait City, Kuwait

2016 - 2024

PROJECTS

Airline Booking System github.com/RCS504/airline-booking-system | Live demo: rcs504.github.io/Portfolio

Solo Project, Java

- Designed and built a 726-line console-based booking engine across 13 files, structured into model, system, and user interface packages over 27 incremental Git commits.
- Implemented 7 domain classes including an inheritance hierarchy (Passenger, FrequentFlyerPassenger) and 4 enumerated types modelling booking, loyalty, seat class, and seat status state.
- Engineered a HashMap-based engine supporting 12 operations, including flight search, seat booking with double-booking prevention, and cancellation guarded against double-cancellation.
- Generated unique 6-character booking references with collision detection via HashMap key lookups.
- Applied input validation across all user-facing operations, eliminating crashes from malformed input.

Food Aid Distribution System

University Group Project, Team of 4

- Delivered the majority of the technical build, spanning database design, backend development, and analytical reporting.
- Designed the relational MySQL schema and entity-relationship diagram across six linked tables with foreign-key constraints and data-validation checks, with fields reflecting real World Food Programme metrics (HungerMap, Vulnerability Analysis and Mapping).
- Built the PHP backend and frontend integration across all six management pages: Regions, Organisations, Food Items, Distribution Centres, Distribution Events, and Event Reports.
- Authored analytical SQL reports surfacing distribution trends across regions and events; visualised results using Chart.js for dynamic reporting.

ACTIVITIES & LEADERSHIP

Queen's University Belfast

2025 - Present

Course Representative, Computer Science

- Represented a cohort of 300 students to teaching staff on assessment and course delivery, appointed for two consecutive years.
- Escalated cohort-wide concerns over a Procedural Programming final, following up until the module's grading was reworked.
- Raised a gap in published revision guidance ahead of a Computer Architecture final, prompting clarification to be issued to the full cohort.

Growing Up Muslim Conference

December 2025

Event Steward, Volunteer

- Coordinated seating, crowd flow, and attendee direction across a 10-hour day at an 1,800-attendee conference with invited speakers.

SKILLS

Languages: Java, Python, SQL, JavaScript, PHP, HTML, CSS

Concepts: Object-Oriented Programming, Data Structures and Algorithms, Relational Database Design, Introduction to Cyber Security

Tools & Platforms: Git, GitHub, MySQL, Visual Studio Code, Eclipse

Certifications: Python for Everybody Specialization, University of Michigan via Coursera (5 courses)

Spoken Languages: English (fluent), Urdu (native), Punjabi (conversational), Hindi (conversational)

ONGOING PRACTICE

- Data structures and algorithms in Java, published at github.com/RCS504/neetcode-submissions
